CAREER OBJECTIVE

Simplicity. Over 20 years of experience with the .NET framework has taught me that it's best to start with the simplest solution that satisfies customer needs. I enjoy working collaboratively but also am highly experienced in delivering full stack solutions independently. I believe in Test First Development, Continuous Delivery, Distributed Version Control, and clean, concise, simple self-documenting code.

RECOGNITION

Microsoft MVP ASP.NET

ASPInsider [aspinsiders.com](#)

ASPInsiders were consulted by Microsoft to collaborate and contribute to the original ASP.NET MVC framework.

WORK EXPERIENCE

Velocity Databank, Inc.

- 2001 - Present
- .NET Solutions Developer

Full Stack .NET Web Developer

- Designed, developed, released, and maintained full stack ASP.NET MVC applications backed by MS SQL
- Converted legacy WebForms based applications to the ASP.NET MVC framework
- Quicklook tools - developed several SPA geological calculators using Vue.js
- Experienced with Razor and custom view engine implementations
- VelSys - online Checkshot Velocity database delivery system for clients such as Anadarko Petroleum, Occidental, Apache, and ExxonMobil
- Transitioned from an in-house web server to continuous integrated AWS Cloud based hosting

Windows Desktop Developer

- Developed several internal and external Windows Desktop applications for the Oil & Gas Exploration industry
- VelComp - Checkshot Velocity interpretation and calculation platform
- VDBx - 3D Velocity database extraction program
- Velociraptor - Internal 3D Velocity Volume interpretation and generation platform
- Experienced with custom Windows Forms Control development
- Working knowledge of WPF

MS SQL Database Administrator

- Fully indexed and properly normalized database solutions
- Knowledge and execution of advanced TSQL queries
- Troubleshooting backup, restore, and indexing issues
- Server and cloud based experience
- Experienced with sqlite
- Familiarity with PostgreSQL/PLSQL
- Some knowledge of NoSQL

"The ASPInsiders team spends countless hours answering questions and giving guidance to other ASP.NET developers, as well as providing feedback and direction on new features for future ASP.NET releases. Their work and contributions are invaluable."

— Scott Guthrie
Executive Vice President
Microsoft Cloud and Enterprise
group

OPEN SOURCE

Developed, released, and updated an open-source desktop blog posting client in 2004 called PostXING. It worked with the MetaWeblog API and allowed posting content to multiple blog engines. Stopped development when Microsoft Live Writer was released.

SKILLS

C# (ASP.NET MVC, Windows Forms,
RESTful APIs)
